CHILDREN "LEAVE FOR CHIMP."

"TOASTIES" GOLDEN-BROWN

POST TOASTIES

WITH CREAM

A child's natural appetite is a pretty good

guide to right food.

Let the youngsters have all the POST TOASTIES

they want.

It is wholesome and nourishing—makes them

plump and ready for study or frolic.

Grow like the POST TOASTIES.

"THE TASTE LINGERS."

LARGE FAMILY SIZE, 100.

THE LIVELY BOOTMAN.

ARNOTT'S

MILK ARROWBOOT BISCUITS.

INSTRUCTIONS HOW TO GIVE THE BISCUITS.

FOR VERY YOUNG CHILDREN—Crumb the biscuits to a powder, and, if possible, put

through a very fine sieve. Take a little warm milk, and gradually add

half a cup of boiling water, stirring all the time. This will make a cupful of

milk, and give it to the child. Later on, when the child is older, give

one or two biscuits at a time, with a glass of water, and tell him to eat

them slowly. The biscuits are very good for the teeth, and will be found a

valuable addition to the child's diet.

FOR OLDER CHILDREN—Put boiling water on the biscuits as they are, and give

them a good way to put a biscuit on the cup or bowl in which the biscuits are

being eaten, and let the child eat them slowly. The biscuits are very good for

the teeth, and will be found a valuable addition to the child's diet.

THE CHILDREN'S HEALTH FOOD.

WELL-REGULATED FAMILIES.

are fully alive to the importance of being prepared for those troublesome attacks of indigestion

and kindred ailments common to all, and of effectively dealing with them in the early

stages before they have become dangerous. As a result, they have always a supply of

Beecham's Pills ready to hand, and as experience has clearly proved, the

remedy is always found to be the best. For removing such distressing disorders as Dyspepsia, Biliousness,

Constipation, Liver troubles in general, and Constipation, it is the most effective and most satisfactory

remedy.

lectures in flying.

LOCAL GOVERNMENT.

OUR STATE SYSTEM.

MUNICIPALISM AT WORK.

THE YEAR'S WORK.

The progressive movement of municipalism throughout the State has been registered during the year by a broadening of the scope of many shires and municipalities. In the independent attitude of the councils has been maintained; their determination to exercise their powers to the full is undiminished; the appeal to the local member for assistance has been less frequent; a complete understanding between the councils and the Local Government Department has been established. The attitude of friendly co-operation assumed from the first by the Minister in charge of this important branch of governmental activity towards the self-governing bodies has been continued, and in very reasonable way the department has left them unhampered, while rendering assistance, either by advice or in more substantial ways, when called upon. It is true there have been reappearance of the old spirit of localism, and dependence upon the central authorities, but they have been few and far between.

EXPANDING THE ACTS.

Again, there has been during the year 1909 a steady unrelenting of the spirit of the principal and amending Acts. The Councils have been invoked many times during the year, particularly upon the shire questions connected with the raising of rates, and a substantial assistance with many of the councils, which have failed to see why individuals or public bodies which profit by municipal energy and expenditure should be exempted from the payment of rates. In the working out of the details of local government many small defects in the machinery have been discovered, and representations made upon the subject to the Minister, who has acted with a view to future action. A forecast was made in this column that it would take fully five years for the provisions of the Act and ordinances to be worked out. The forecast was not too far from the mark.

PURE FOOD REGULATIONS.

A number of important regulations under the Pure Food Act will come into force on the 1st of January, 1910. These regulations deal with the standards of butter, cheese, margarine, condensed milk; with the methods and apparatus for determining the strength of spirits or alcoholic liquors; and with the standard of soap. The butter standard is not less than 82 parts per centum of milk-fat, and not more than 16 parts per centum of water, without addition of common salt and of harmless vegetable coloring matter; and shall contain no foreign fat. Boric acid shall not exceed 0.05 per cent, and may be added as a preservative. Re-worked butter may have added to it milk cream, water, salt, and harmless coloring matter. Here there must be 82 per cent, of milk fat and not more than 16 per cent, of water, and the product shall be labelled "Re-worked butter." The great regulations. The general standard of cheese is not less than 72 parts per centum of milk-fat in its water, free substance, and no foreign fat may be added. Cream cheese must contain not less than 60 per cent, of milk-fat, and not more than 40 per cent, of water, and the standard of margarine is also set, with the percentage of boric acid, preservative allowed, and the nature of the label. Condensed milk must contain not less than 72 parts per centum of milk-fat, and not more than 28 parts per centum of water, and the standard of margarine is also set, with the percentage of boric acid, preservative allowed, and the nature of the label. Condensed milk must contain not less than 72 parts per centum of milk-fat, and not more than 28 parts per centum of water, and the standard of margarine is also set, with the percentage of boric acid, preservative allowed, and the nature of the label.

Condensed milk must contain not less than 72 parts per centum of milk-fat, and not more than 28 parts per centum of water, and the standard of margarine is also set, with the percentage of boric acid, preservative allowed, and the nature of the label. Condensed milk must contain not less than 72 parts per centum of milk-fat, and not more than 28 parts per centum of water, and the standard of margarine is also set, with the percentage of boric acid, preservative allowed, and the nature of the label.
